Launch Date Postponed for Nevada's Health Care Guidance Program

The Division of Health Care Financing and Policy (DHCFP) has announced the postponement of the new Care Management Organization (CMO), also known as the Health Care Guidance Program. Although the original start date of April 1, 2014, has been postponed, the DHCFP hopes to implement this type of care management program within the next few months.

The program is designed to help improve health outcomes for Medicaid's sickest Fee-for-Service recipients by offering additional support to recipients and providers. The program will include the coordination of transitional care, follow-up appointments, support services, preventive health and use of health information technology. Future web announcements on this website (www.medicaid.nv.gov) will provide additional information regarding the implementation of this program.
